

## RAL Powder Coatings

Meets or Exceeds AAMA 2604

Vitracoat offers almost 200 RAL colors that can be custom made in a range of chemistries and gloss levels. This RAL color system is a globally recognized European color standard. Most shades are available as superdurable and meet AAMA 2604 requirements, making them suitable for indoor and outdoor applications. Stocked throughout the United States and Mexico, our RAL colors are readily available to you in 25 lb. boxes.

### Features & Benefits:

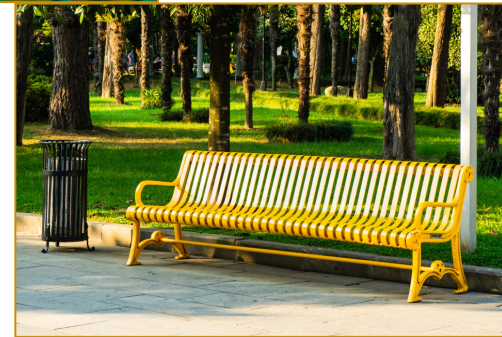

- Match to RAL K7 Standards
- Meets or exceeds AAMA 2604 specifications
- Low cure systems 10 minutes at 375 degrees
- > 190 RAL colors in stock

Vitracoat offers a guaranteed program with our inventoried products. If we do not have the product in stock at one of our nationwide locations, we will produce that product within 5 business days or will pay for ground transportation from our location to you.
