

Anti-Graffiti Coatings

While no anti-graffiti coating resists all forms of graffiti applied to them, the VitraCLEAN powder coatings are formulated to have anti-graffiti and stain resistance properties, protecting surfaces from the permanent effects of some spray paint and permanent markers. It makes cleaning more manageable and offers excellent exterior durability.

Because of their unique weatherability and chemical resistance, these powder coatings are ideal for many applications such as lockers, restroom stalls, signs, public transportation, and playground equipment.

Features & Benefits:

- Single coat system
- Excellent weatherability
- Medium to high gloss products
- Excellent chemical resistance
- More manageable to clean

Technical Summary:

The following is general information on the exterior durability and graffiti-resistant properties of VitraCLEAN powders. It is recommended to test the suitability of these coatings for the intended end use prior to application.

- Minimum of 70% concentration of isopropyl alcohol (IPA) removes most black permanent markers* with light wiping. Any shadowing is typically very faint. Markings made with strong force and/or left on the surface for an extended period of time, may leave a very slight shadow after removal with IPA.
- Lab results show that solvents such as acetone and many general-purpose cleaners can be used to remove graffiti such as spray paint* and permanent marker* with little effect on the coating, or in some cases, you may experience some loss of gloss of the coating.
- It is recommended that you first test on an inconspicuous surface area to determine suitability.
- Avoid abrasive cleaners as they can scratch the surface of the coating.
- The ease of cleaning graffiti from the coating is reduced by surface breaks or irregularities such as fine scratches made by rough marker tips, non-smooth surface profiles, porous metal surfaces, or orange peel as a result of poor application technique.

* Spray Paint- DupliColor® Perfect Match™ Premium Automotive Paint BTY1623 Dark Blue Pearl (8P4)
Permanent Marker: Sharpie® Chisel Tip Permanent Marker Black & Red; Azor® Signal® Xtra® Refillable Permanent Marker
